We look forward to working with you in the future.

About Our Company

Since forming in the fall of 2000, Missouri River Plastics has become an innovative supplier of plastic products for work and play. Missouri River Plastics is committed to providing their customers with exactly what they want, an innovative product that is durable, functional and affordable.

In six short years MRP has grown from a small company with modest sales to an innovative supplier with regional and national contracts. 2007 ushered a new distribution facility in Broomfield, CO to handle even larger volumes

Missouri River Plastics has created a unique series of Sand Bottles that easily mount to your existing fleet of Golf Cars. These designs have evolved after talking to course owners across the country and taking their input to the drawing board.

In 2008 we introduced a new product called the Sand Mug. These convenient and sturdy bottles continue to receive praise and thanks from owners and golfers alike.

2009 we are proud to introduce a Commercial Grade Ball and Club Washer to our line of golf products. This Ball and club washer is great for home, course, or private car use.

Our Sand & Seed bottles were tested by Golf Test USA and received their "Seal of Excellence". We are the only sand bottle manufacturer to have received this distinguished honor. We continue to grow and expand. We are committed to providing each customer with excellence!

****All Bottle kit models include: A bottle, holder, Hardware & Instructions sealed in a poly bag**
